

Safe Delivery Guide

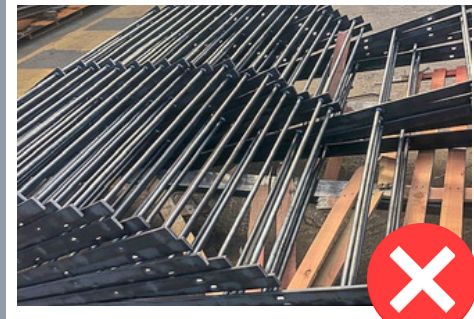

Stacking and Packing

Banded

**Shrink-
wrapped**
(as necessary)

Labelled

Anything that doesn't meet these requirements will not be accepted by the driver.

CARDBOARD BOXES ARE NOT AN ACCEPTABLE FORM OF PACKAGING.

Loading and Securing

**Banded to a
pallet**

**In contact
with a
headboard**
(if possible)

Weight kept low and central
(No layer heavier than the one
beneath it)

Why is this important?

Keeping the load weight low, central, and securely stacked and packed means the vehicle remains stable when it moves or brakes.

Otherwise, the load could fall off into the road which can **seriously harm or even kill**.
